DETAILED ACTION

Response to Amendment

1. Receipt is acknowledged of the Remarks filed June 22, 2005.

Allowable Subject Matter

2. Claim 1 is allowed.
3. The following is an examiner's statement of reasons for allowance: none of the cited prior arts of the record discloses, teaches, or fairly suggests a data carrier comprising, among other things, a solar cell for detecting the usability or probability of use of a display in which the solar cell and a battery are electrically connected in series, and the voltage of the battery being lower than the threshold voltage of the display.

Drifus patent (US 4,812,634) discloses a device arranged to operate in a standby mode and in an operating mode. A battery supplies the power for the device during the standby mode, and photocells provide the power for it during the operation mode.

Poulachon (FR 2725084 A1) does not cure the deficiencies of Drifus. Poulachon does not disclose features as recited in the present application.

After further search and thorough examination of the present application and in view of the Applicant's arguments, claim 1 is found to be in condition for allowance over the prior art made of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
